New Septic Permit #2018-999

Dear Mr. Connell,

This department received an engineered design for the installation of a septic system located at the above address. The permit is approved with the following stipulations;

1. Install per your engineer; Rocky Mountain Group dated February 15, 2018, Job #159927. System designed for FOUR (4) bedrooms.
2. The septic system must NOT be installed within any flood plains. Provide documentation of flood plains on site.
3. Installer must be licensed to install septic systems in Elbert County, be approved by engineer and be familiar with installing septic systems. Installer and builder responsible for placement of system within property boundaries and in area of soils tests.
4. All electrical installations must be performed by licensed electrician and be inspected. All electrical boxes must be mounted properly and off the ground at the septic tank(s).
5. Engineer must perform their required inspections. Installer must contact this department with any installation problems and for required inspections. Installer must also provide "record drawing" of completed system to this department.
6. Engineer must provide final signoff and acceptance of the installation to this department.

If you or your installer should have any question, please contact this department.

Gary L. Hartzell
